This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

STATE OF NEW YORK.

No. 6.

IN ASSEMBLY,

JANUARY 15, 1906.

REPORT OF THE RESULTS OF THE ENUMERATION

TAKEN AS OF JUNE 1, 1905.

STATE OF NEW YORK,
OFFICE OF THE SECRETARY OF STATE.
ALBANY, *January* 15, 1906.

To the Legislature of the State of New York:

I have the honor to transmit herewith to the Legislature a report of the results of the enumeration of the inhabitants of the State, taken as of June 1, 1905, as provided by chapter 83 as amended by chapter 144 of the Laws of 1905.

This report gives the number of inhabitants, distinguished as citizens and aliens, in the several counties, towns, cities, incorporated villages, and districts of the State, the loss and gain in population arising from the distribution of the inmates of State and county institutions according to actual residence, and a summary of the population of the Indian reservations of the State. The report comprises six tabular presentations as follows:

Table I.—Total inhabitants distinguished as citizens and aliens, by counties.

Digitized by Google

Table II.—Total inhabitants distinguished as citizens and aliens, by towns, cities, boroughs, wards and assembly districts.

Table III.—Total inhabitants distinguished as citizens and aliens, by election districts and, for the counties of Kings and New York and the cities of Buffalo, Rochester and Tonawanda, by blocks.

Table IV.—Total inhabitants distinguished as citizens and aliens, for incorporated villages.

Table V.—Loss and gain in population due to the crediting of the inmates of State and county institutions according to actual residence at time of admission to institution, by cities, towns and villages.

Table VI.—Indians and other persons enumerated on reservations in the State of New York.

The results of the enumeration for the State at large show a total population of 8,067,308, of which 7,062,988, or 87.6 per cent., are citizens and 1,004,320, or 12.4 per cent., are aliens. At the last State enumeration, taken as of February 16, 1892, there were returned 6,513,344 inhabitants, divided into 5,790,865 citizens and 722,479 aliens, or 88.9 and 11.1 per cent., respectively.

The law under which the enumeration was taken was approved March 21, 1905, and preparations were made immediately thereafter to have the enumerators begin their work on June 1, 1905, the date as of which the Federal census has been taken since 1830 and also the date of the last quinquennial census taken by the State in 1875.

The enumeration was taken, under the law, by election districts as they were constituted territorially in November, 1904, representing, in all, 4,570 districts. To facilitate the work the enumeration of a few of the larger public or private institutions of the State, to the number of 53, was taken from the enumerators of the election districts in which they were severally situated and special enumerators appointed,—generally officers or employees of the institutions themselves,—a similar plan having been followed at the United States census of 1900 with very successful results.

The large proportion of foreign-born population and its concentration in cities chiefly added to the difficulties of the enumeration, and they were further increased by the requirement of the law for the return of population by blocks in the counties of Kings and New York and in the cities of Buffalo, Rochester and Tonawanda, the counties and cities named comprising more than one-third (35 per cent.) of all the election districts and more than one-half (53 per cent.) of the entire population of the State. These conditions were met by the appointment of supervisors for these counties and cities, and, in addition thereto, for most of the counties containing any city of

Digitized by Google

considerable size; or, in other words, for about one-half of all the counties in the State. The more direct control of the enumerators in these counties, by having a supervisor on the ground ready to act in any emergency, was of great practical benefit to the work of enumeration and aided the office materially in its efforts to make the canvass thorough and complete.

The enumerators were also required by the law to make their returns to the Secretary of State in duplicate, one copy to be retained in his office and one copy to be forwarded by him to the county clerk of the county to which the returns relate. This provision of the law was not observed by the enumerators in all cases, but wherever a single copy only was received and was found to be complete the duplicate copy was made in the office of the Secretary of State, thus to that extent preventing delay in the completion of the enumeration and also avoiding the possibility of the loss of the original return in its transmission to and from the enumerator. At the enumeration of 1892 the returns were also required to be made in duplicate, but one copy was forwarded by the enumerator direct to the county clerk without its passing through the office of the Secretary of State. While the requirement of the law of 1905 may have added somewhat to the duties of this office in examining and verifying both sets of returns it has had the effect of enhancing their accuracy, as the comparison of the two returns in determining the number of citizens and aliens has afforded the means of correcting whatever differences existed between them and of bringing them into substantial agreement.

The appropriation provided for by section 20 of chapter 83 of the Laws of 1905—$300,000—has been practically expended in taking the enumeration of the inhabitants of the State, in accordance with the terms of the law, and in making the compilation according to citizenship required for purposes of the reapportionment of Senate and Assembly districts. The per capita cost of this work, covering more than 8,000,000 persons, is 3.7 cents, as against a similar cost in 1892 of 3.2 cents. The difference (0.5 cents) in the cost per capita between the two enumerations is more than accounted for by more careful and direct supervision of the field work, through the appointment of county supervisors in the more populous sections of the State, and by the greater difficulty in the work of enumeration arising (1) from the large increase since 1892 in the foreign-born population and its concentration in cities largely and (2) from the requirement of the law for the return of population by blocks in certain counties and cities, as previously explained.

Digitized by Google

Since the preliminary announcement of the total population of the State, given to the newspaper press on October 30, 1905, minor changes have been necessary, representing an increase in the total population of the State of 636, due in part to errors in the returns developed by the count for citizens and aliens and in part to corrections made as the result of a re-examination as to the completeness of the enumeration in a few of the smaller cities and villages. In all such cases the matter was given careful and thorough examination on the ground by a representative of this office and such correction made, if any, as the facts warranted.

In providing for the return of population by blocks in the counties of Kings and New York and in the cities of Buffalo, Rochester and Tonawanda, a map was furnished to the enumerator for each election district therein, in which the blocks were denoted by letters or letters and figures, according to the number of blocks comprised in each of said districts. The results of the enumeration by blocks is given for these counties and cities in table III. In the counties of Kings and New York, as explained in the foot-notes to said table, parts of blocks situated in one district have been taken to form parts of blocks in another district, for enumeration purposes, in conformity to the provisions of the Constitution which stipulate that no block in a city inclosed by streets or public ways shall be divided in the formation of Senate or Assembly districts. In the county of New York, also, in a few of the election districts of the Thirty-fifth Assembly district and in all of the election districts of the Annexed district, the return of population is not made by blocks for the reason that the blocks as indicated on the maps therefor did not represent sufficiently conditions as they actually existed in said districts. In certain cases, too, the population is given for two or more blocks in combination, it having been found in the course of the enumeration that the maps, in such cases, were not accurate in all particulars. As stated in the head-notes to said table, if a block letter, or letter and number, is missing in its regular order and is not given in combination with another letter or letters, the omission signifies that it contains no inhabitants.

The loss and gain in population, under the plan of crediting the inmates of State and county institutions to the city or town of actual residence at the time of admission to the institution, is given for each city, town and village in table V. A similar plan was pursued in 1892, but at no other State or Federal enumeration, and this should be borne in mind in making comparisons with the results of preceding censuses.

Digitized by Google

The enumeration of the Indian reservations of the State, as summarized in table VI, shows a population in 1905 of 5,060, including 4,821 Indians and 239 other persons. The latter class comprises 237 white and 2 black persons, of whom 182 are returned as citizens and 57 as aliens. The population of each of these reservations is included in that of the county or counties in which they are in whole or in part situated, all Indians except those on the Oneida reservation being considered as aliens.

The inquiries made on the schedule used at the enumeration of 1905 comprehended the following subjects:

1. Residence (street and house number).
2. Name (surname, given name and middle initial, if any).
3. Relationship to head of family (wife, son, daughter, boarder, servant, etc.).
4. Color or race (white, black, Chinese, Japanese or Indian).
5. Sex (male or female).
6. Age at last birthday (single years of age).
7. Nativity (country of birth).
8. Number of years in the United States (for persons of foreign birth only).
9. Citizenship (citizen or alien).
10. Occupation, trade or profession (including school attendance, in months, for persons of school age).
11. Class (employer, working on own account, or salary or wage worker, for persons gainfully employed).
12. Residence (borough, city or town, and county) at time of admission (for inmates of institutions only).

Of the above-named subjects of inquiry, but a single compilation has been made, in conformity to the requirements of section 16 of chapter 83 of the Laws of 1905, that relating to citizenship, but without distinction of color, sex, age or nativity. When the legislation was effected for this enumeration no provision was made for a complete census, as in 1855, 1865 and 1875, but the means are at hand, from the data already gathered, for the preparation of a most valuable and instructive report concerning the population of the State, showing in detail its distribution according to color, sex, age, nativity, citizenship and occupation. This information was obtained by the enumerators in June last, as provided by the law, at a total cost of $300,000, and by a relatively small additional expenditure it will be possible to secure a very complete exposition of the condition of our population at the present time. There is, moreover, a well-defined and urgent

Digitized by Google

need for this detailed information, as embodied in the requests of the State Commissioner of Labor, for a complete tabulation of the returns on occupation; of the State Commissioner of Education, for information concerning persons of school age, in all cities and villages of 10,000 inhabitants or more; and of the State Commissioner of Health, acting in conjunction with the Director of the United States Census, for a distribution of the population of the State according to sex, age, race and nativity. Provision for a detailed tabulation of the returns of the recent state enumeration, in a manner to conform substantially to the above requests, would involve an expenditure of about $100,000.

The detailed tabulation of the returns and the publication of a census report including all of the population data covered by the enumeration of 1905, as well as supplying the information desired by the Departments of Labor, Education, and Health, and by the United States Census Bureau, would mean a further expenditure of about 1 cent per capita, or a cost for the entire work, including that of the enumeration, of less than 5 cents per capita.

Besides New York, there are 13 states which have taken a quinquennial census and in most of these states provision is made for a detailed tabulation and publication of the returns. These states are as follows: Florida, Iowa, Kansas, Massachusetts, Minnesota, New Jersey, Oregon, Rhode Island, North Dakota, South Dakota, Utah and Wisconsin, in 1905, and Michigan, in 1904.

New York, with its 8,000,000 inhabitants, is easily the first in importance of all the states named and the value of an adequate report, in keeping with its rank, is obvious.

In the work of enumeration and in the preparation of the report herewith submitted, I have had the benefit of the services of Mr. William C. Hunt, an expert of the United States Census Bureau, who has served as chief statistician in charge of the Enumeration Bureau, and who has been assisted by Mr. Charles V. Hooper, of this office, as chief clerk. To both of these gentlemen I am greatly indebted for the careful and painstaking manner in which the entire work has been conducted, and it is a pleasure to testify to my appreciation of the trying and exacting service rendered by them.

Respectfully submitted.

JOHN F. O'BRIEN,
Secretary of State.

TABLE VI.

INDIANS AND OTHER PERSONS ENUMERATED ON RESERVATIONS IN THE STATE OF NEW YORK.

Digitized by Google

Digitized by Google

TABLE VI.—INDIANS AND OTHER PERSONS ENUMERATED ON RESERVATIONS IN THE STATE OF NEW YORK.

[The population of the Indian reservations is included in that of the county or counties in which they are severally situated.]

RESERVATION.	County.	Total.	Indians.	Other persons.
Allegany	Cattaraugus	866	861	5
Cattaraugus	Cattaraugus, Chautauqua and Erie	1,472	1,304	168
Oneida (a)	Madison and Oneida	104	104	.....
Onondaga	Onondaga	525	482	43
St. Regis	Franklin	1,206	1,198	8
Tonawanda	Erie and Genesee	503	503	.....
Tuscarora	Niagara	384	369	15
Totals		5,060	4,821	239

a Indians on Oneida reservation returned as citizens and included as a part of the population of Oneida city, in Madison county, and of Vernon town, in Oneida county, respectively.
